How to use Turnitin in chalk&wire

Step 1 (Student): Upload your document file into the assignment
Refer to the PDF “Chalk & Wire Startup Guide - For Students” for documentation on how to upload a file into your e-portfolio assignment.

Step 2: (Student) Click on the “Check Originality” button
The button will appear next to the file icon in your assignment page.

The first time you click on the Check Originality button, you will see a Terms of Use agreement. Agree to the terms. This notice will not appear again.

Step 3 (Student): Let the review process complete

Turnitin will compare your document to its database. This process may take up to 15 minutes (likely a lot less). You can close out the panel and return to it later or just wait until it finishes.

![Turnitin Originality Report]

Step 4 (Student): Launch the review

Click on the Launch button to review the results. The review notes will open in a new browser tab.

Step 6 (Student): Submit your assignment

If your document is OK, submit your assignment using the Submit button.

You will see a notification that Turnitin is enabled for your Assessor (see below). You can close this panel to abandon your submission, or click into the text box to select your Assessor (instructor) to submit your assignment.

This completes the process for students. Continue to the next page to review the Assessor (instructor view).
Assessor: Review the student submission

When you receive the notification that a student has submitted work to be assessed, assess the assignment as you normally would. (For instructions, please review the PDF guide “How to do a Chalk & Wire assessment”).

When you review the submission, note the “Check Originality” button.

The report will open in a new browser tab. Review the Turnitin report. When you are done, close the browser tab.
